

Dozing Pump

Features & benefits :

- Made of high quality material ensuring long life.
- Used to inject precise amount of nutrients, fertilizers, or other chemicals into the micro-irrigation system.
- Ensures right amount of nutrients directly to plant.
- With the control valve the quantity of the solution can be controlled.
- Higher injection rates are possible compared with fertigation tank & venturi.
- Attachment with drip automation is possible.

Available models :

- Available models in 1 to 3 HP models in single & 3 phase.

Applications :

- Used for injection of chemical & fertilizer through micro irrigation system.
