FILTRATION & FERTIGATION UNIT

Filtomat Filter

Features & benefits :

- Hydraulic self cleaning filter controlled by ADI-P controller.
- The most efficient hydraulic filters that requires no external power source.
- Large filtration area.
- Reliable operating mechanism & simple construction.
- Automatic flushing according to pressure difference.
- No interruption of downstream flow during flushing.
- Minimal volume of rejected water.

Applications :

- Ideal solution for agricultural and municipal filtration systems.
- Used in big open field micro irrigation.

Available Sizes :

Available in 10", 12" & 14" sizes with 400, 600 & 800 m³/hr filtration capacity.
