

## K-Flex Submain Pipe

### Features & Benefits :

- Made of high quality HDPE material.
- No trenching required for the submain laying.
- Easy to lay flat distribution pipe used for main & submain line.
- UV resistant, hence long life is possible even if laid on the surface.
- No drilling required & easy to make lateral connections.
- Very easy to install in odd shaped plots.
- Easy shifting & handling without any damages.
- Cost effective freight, storage & handling compared with PVC Pipe.
- More saving in installation charges compared with PVC Pipe submain.
- Very easy in shifting after the completion of the season.

### Available sizes :

Available in 63mm x 2.5" & 75mm x 3" in 61 meter length
