

PC Dripper

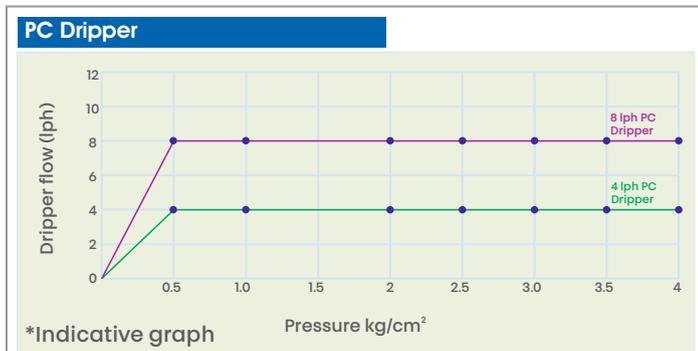

(Online PC Dripper)

Features & benefits :

- High quality plastic with silicone diaphragm ensures self-flushing mechanism.
- Avoid low head drainage of water after.
- Non openable dripper with color coded cap.
- Adoptable with multi branch outlet.
- Flow unaffected by varying inlet pressure or slopes.
- Drippers with low CV & high uniformity coefficient.
- Narrow plus shaped inlet (+) act as filter.
- No effects of UV radiation & environment effects.

Applications :

- Ideal application includes vine yards, green house, nurseries and landscape.
- Used in pulse irrigation application.
- Recommended for Irrigation on undulating terrain, slopes & for longer length.

USP : PC Dripper

Silicon diaphragm ensuring PC action every time

Barbed + shaped Inlet avoids entry of soil particles

Extended outlet for attachment of 4mm extension tube

Side mounted round Turbulent area makes the dripper clog resistant

IS 13487 - 2024

Available dripper types : 4 lph & 8 lph

Operative guidelines :

- Uniform flow rate at wide range of pressures from 0.8 to 3.5 kg/cm².
- Filtration recommendation of 130 microns or less.
- Use continuous acting air valve on sub-main.
- Always use NRV on mainline.

Ordering guide :

Product	Flow rate (lph)	Std. packing
PC Dripper	4	100 No.
	8	100 No.

*Example : PC Dripper 8 Lph
