

KOTHARI[®]
— IRRIGATION —

DRIP | SPRINKLER | AUTOMATION | MULCHING

SPRINKLER UNIT

Pop Up Spray Heads & Rotor

Features & benefits :

- Spray head pop ups having no rotating part.
- Rototer having gear operated system for uniform spraying.
- The changing of nozzle can form different spray patterns.
- The pop up comes out, irrigate & moves down after operation.
- Fitted at soil surface level hence no damages to it due to movement over soil surface.
- Use swing joints for pop up fitting to have maximum life.
- **Applications :** used in landscape irrigation & turf.

Operating Guidelines :

- Use 120 to 150 micron filtration.
- Operating pressure from 1.5 to 4 kg/cm².
- Use swing joints for installation for long life.
