Pressure Sustaining Valve

Features & benefits :

- Hydraulically operated, diaphragm actuated control valve with high flow capacity.
- Sustains minimum preset upstream (back) pressure & opens fully when line pressure is in excess of the setting.
- Unitized flexible super travel (FST) diaphragm & guided plug :
 - a) Accurate & stable regulation with smooth closing.
 - b) Requires low opening & actuation pressure.
 - c) Prevents diaphragm erosion & distortion.
- Made of engineering plastic with user friendly design & simple inline inspection & service.

Available sizes : 2", 2" L, 3" with maximum pressure of 10 kg/cm².

Applications :

- Line fillup control with line emptying prevention.
- Infield filters & backwash pressure sustaining.
