

Raingun

Features & benefits :

- Raingun system is used to cater the irrigation of large field areas.
- Cover large area in single shifting & minimizes the number of shiftings.
- This irrigation helps in washing away of pests & insects.
- The adjustable jet breaker ensures proper droplet size for delicate crops.
- With the help of raingun stand, raingun system can be easily shifted from one field to another & thus maintaining the easy portability.
