Solenoid Control Valve

Features & benefits :

- Hydraulic control valve with electrically solenoid controlled on / off.
- Hydraulically operated, diaphragm actuated control valve with preset maximum flow rate.
- The unique body design allows on site adaption to a wide range of end connections, types & sizes.
- Its articulated flange connection isolates the valve from pipeline bending & pressure stresses.
- Either opens or shuts in response to a remote pressure command.
- High flow capacity with low pressure loss.
- Operating range of 0.5 to 10 kg/cm²
- Solenoid voltage range of 24V AC, 9-20V DC latch.

Applications : Controller based automation irrigation system.

Available Sizes :

Size	2"	2"L	3"	3"L	4"	6"
Flow (m ³ /hr.)	25	35	50	80	100	175
End connection	Threaded	Threaded	Threaded	Flanged	Flanged	Flanged
