DRIP UNIT

Throttle Valve

Features & benefits :

- Valve with zero or very minimal head loss.
- Used with header assembly for proper venturi operation.
- Strong brass rod inserted adding to the life of the throttle valve.
- Available with female threaded end connections.
- Available in 2", 2.5" & 3" sizes in PN-6 & PN-10.
- Visual indicator for showing % of closing of valve.
- Specially designed pin avoids the extra movement of the float to avoid breakage.
