

## Turbo Dripper

(Online NPC dripper)

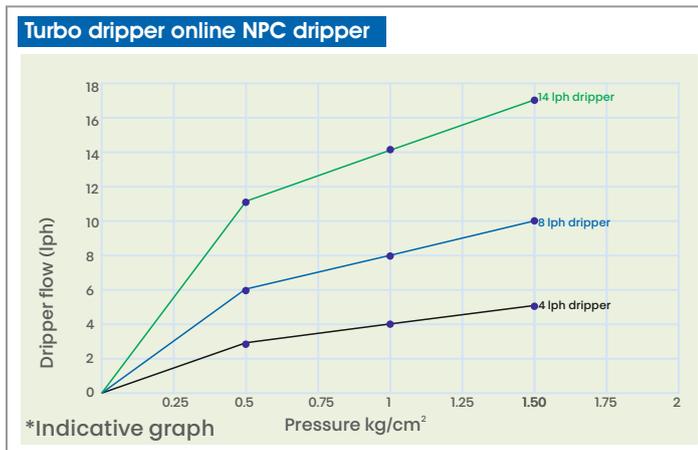

### Features & benefits :

- Manufactured by using advanced Israeli technology.
- Turbulent flow path with wide cross sectional area makes dripper clog resistant.
- Openable dripper hence easy to clean.
- Narrow plus shaped inlet (+) act as filter.
- No effects of U.V. radiation & environment effects.
- Excellent flow characteristics.
- Dripper with low CV & high uniformity coefficient.

### Applications :

- Recommended for irrigation of orchards, vegetables, fruit crops & floricultural plants on flat terrain or on moderate slopes.
- Also useful in pot irrigation & landscape.

Available dripper types : 4 lph, 8 lph, 14 lph

## USP : Turbo Dripper

Easy opening & cleaning of dripper

Barbed + shaped Inlet avoids entry of soil particles

Extended outlet for attachment of 4mm extension tube

Turbulent labyrinth cross section makes dripper clog resistant

IS 13487 - 2024

### Operative guidelines :

- Nominal operating pressure of 1kg/cm<sup>2</sup>.
- Always use turbo dripper spanner for opening & closing of dripper.
- Filtration recommendation of 130 micron or less.
- Always use NRV on mainline.

### Ordering guide :

Product	Flow rate (lph)	Std. packing	Dripper color
Turbo dripper	4	100 No.	Black
	8	100 No.	Blue
	14	100 No.	Green

\*Example : Turbo dripper 8 lph
